(54) PROPOSING MACHINE OF AUTOMATIC AUCTION PROCESSING SYSTEM

(57)Abstract:

PURPOSE: To use circuits is common and simplify the circuit constitution, and to improve scanning efficiency by scanning discrimination information and the number of proposals at the same time.

CONSTITUTION: The proposing machine K sends a proposing signal for responding to the auction of a listed article to an auction operation device S that an auctioneer operates with a proposing button B that a purchaser operates and is equipped with discrimination information setting means 14a-14c having identification information on purchasers and are scanned with a scan input signal to output discrimination signals to the auction operation device S, a no. of proposal setting means N which sets the number of proposals for the listed article and is scanned with the scan input signal to output a no of proposals to the auction operation device S, and a scan input signal transmitting means 22 which sends the scan input signal to the discrimination information setting means 14a-14c and no. of proposals setting means N. Then when the proposal button B is turned ON, the scan input signal is sent to the discrimination information setting means 14a-14c and the no. of proposal setting means N at the same time, thereby scanning the discrimination information and the number of proposals at the same time.

LEGAL STATUS

[Date of request for examination]	16.05.1996
[Date of sending the examiner's decision of rejection]	21.10.1997
[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]	
[Date of final disposal for application]	
[Patent number]	
[Date of registration]	
[Number of appeal against examiner's decision of rejection]	
[Date of requesting appeal against examiner's decision of rejection]	
[Date of extinction of right]
